

## Safeguarding Snapshot – 14.03.25

### Artificial intelligence safety tips for parents

As technology continues to evolve, it brings both exciting opportunities and new challenges. One of the latest developments is the rise of Artificial Intelligence (AI), which has become an integral part of many online platforms that our children use today.

We understand that as parents, ensuring your child's safety in the digital world is of paramount importance. To help guide you through the potential risks and provide you with practical steps to keep your child safe, we would like to share a valuable resource with you.

The NSPCC (National Society for the Prevention of Cruelty to Children) has recently published a guide titled “**Artificial Intelligence Safety Tips for Parents**”. This guide offers expert advice on how to navigate the evolving landscape of AI, highlighting potential risks and providing tips on how to protect your children online.

You can access the full article by clicking on the following link: [AI Safety Tips for Parents](#)

We highly recommend taking a moment to read through this guide and consider how you can apply these tips in your own household. The guide covers topics such as:

- Understanding AI technologies and how they work
- Identifying potential risks to your child's privacy and security
- Setting up appropriate privacy settings on devices
- Encouraging open conversations with your child about their online experiences

By staying informed, you can help your child use technology responsibly while keeping their safety and well-being a top priority.

Should you have any questions or concerns, please email your child's Year Leader or the Safeguarding Team via the school office, [office@vynersschool.org.uk](mailto:office@vynersschool.org.uk).
