

## **Safeguarding Snapshot – 25.04.25**

### **What can we learn from Netflix ‘Adolescence’: a resource for parents**

Whether you have seen the show or not it is likely that you have been aware of the national press around the recent Netflix show ‘Adolescence’, which in addition to the main plot of extreme behaviour explores many themes relevant to young people, including emoji use, algorithms and the dangers of exposure to extreme views.

There are many resources available from different providers for school, students and parents based around themes in the show. Smoothwall have created a number of articles and pages to support parents around a number of the topics covered in each episode. Please see the [smoothwall website](#) for these resources.
