

Vyners School	Page 23
YEAR 10 to YEAR 11	HOME LEARNING SCHEDULE - Summer 2014
Course Title	GCSE Science

GCSE Course title: Science

Compulsory work set:

Scientific Literacy planning sheets for Biology, Chemistry, and Physics. All of these tasks relate to the work covered in year 10, and are designed to act as a planning exercise for the 6 mark mini essay questions which make such a big difference to final grades. For each of the titles, students should endeavour to write 6 brief bullet points, in a logical sequence. The bullet points should include any relevant key words, used in a context which clearly shows that their meaning is understood.

Extension work set: Write 3 additional 6 mark questions for each subject.

Optional work set: Write mark schemes for the questions you have written.

Approximate time these tasks will take:

90 minutes per sheet. The majority of this time should be spent reading and researching, not writing.

Where you can find the sheets:

The resources for students are available on the student share drive to download in the 'Science' folder in a sub-folder entitled 'Year 10 to Year Home Learning'.

What students could purchase:

AQA Science GCSE revision CGP, the Core and Additional book is appropriate for those doing double science, but those doing triple will require the separate sciences revision guides (Biology, Chemistry and Physics).

How this work will be assessed at the start of Year 11:

Through a combination of peer assessment and teacher assessment.

I confirm that my son/daughter has completed this work.
