

## Environmental sustainability week Three days to go...

The weather forecast for Monday is 8°C with sunny intervals so it works well for our plans for the opening ceremony.

### Message from Lord John Randall

I would like to congratulate Vanguard Learning Trust for organising its first environmental sustainability week. I was delighted to be involved in 2021 with the dragons' den project, which supported students' projects in all five schools, with several being involved in this themed week, including Ruislip High's ecohub and Ryefield's 'emission control' game. I am sure it will be a huge success and I look forward to hearing about the activities including the reduction of the Trust's carbon footprint through the 'how low can we go?' challenge.

### Students and families

#### What can you do over the weekend?

- get the books you are planning to bring to school for swapping/donating organised;
- decide the different challenges you will be doing each day, including over the weekend; and
- watch the videos in the booklet ready for questions that will be set every day with prizes for the students and families of primary-aged children.

### Staff

#### What can you do over the weekend?

- get the books you are planning to bring to school for swapping/donating organised;
- decide the different challenges you will be doing each day, including over the weekend; and
- start posting on the staff R&R platform for items to donate or items you are looking for.

### Programme

The final programme for the week is now available on the Trust's website ([click here](#)).

The big question: how low can we go?

The poster features the Vanguard Learning Trust logo at the top left. Below it, the text reads 'Environmental sustainability week' in a large, bold font, followed by 'Monday 27th February to Friday 3rd March 2023'. A quote from Sir David Attenborough is included: 'We need to move beyond guilt or blame, and get on with the practical tasks at hand.' Below the text are three images: a 'ONE WORLD' sign with a globe, a glass globe on a rock, and a landscape with wind turbines.
